Technical Skills

Testing Area's	:	Manual and Automation Testing.
Programming Languages	:	Core Java, Python
Testing Tool	:	Selenium WebDriver, GitHub, PyCharm, Eclipse
Bug Tracking Tools	:	Mantis, VersionOne, Jira
Database	:	SQL Server
Operating Systems	:	Windows Family

Projects #

Exterro R&D Pvt Ltd [Subsidiary of Exterro Inc – US]

Methodology	:	Agile development environment with frequently changing requirements.	
Platform	:	Core: Java & Python Database: SQL & Oracle	
Environment	:	AWS, JBoss, Tomcat, Cassandra, Redis.	
Multiple Projects	:	<u>1. PRODUCT : Forensic Toolkit(FTK)</u>	

Forensic Toolkit, or **FTK**, is a computer forensics software made by AccessData. It scans a hard drive looking for various information. It can, for example, potentially locate deleted emails and scan a disk for text strings to use them as a password dictionary to crack encryption

2. PRODUCT: Fusion

E-Discovery is full of challenges - high costs that can run into the millions, the complexities of managing multiple stakeholders, and the risk of disclosing privileged information, just to name a few. Exterro's intelligently integrated software applications, built upon the Fusion platform, can help you solve those problems and manage e-discovery smarter from identification to preservation to collection, analysis, review and production.

3 PRODUCT – Zeta.

Exterro E-Discovery Data Management is the sole Collection, Analysis, Review and Production solution on the market that identifies the most important electronically stored information (ESI) before collection. With this unique capability, in-house attorneys now have early and easy access to key documents that can change the course of a legal matter.

Roles & Responsibilities:

- ✓ Understand the requirements, configuration & customizations given by client.
- ✓ Test case preparation for client configurations/customizations/change requests.
